h (510) 963-0798

a Fremont, California 94536

PROFESSIONAL SUMMARY

Enthusiastic entrepreneur and developer eager to contribute to team success through hard work, attention to detail and excellent organizational skills. A clear understanding of project architecture, React, and REST APIs. Motivated to learn, grow, and excel in Full-Stack development!

SKILLS

- Database management (MongoDB)
- REST APIs (Flask, Express.js)
- Frontend Development (React.js / React Native)
- Minimal Blockchain experience
- Algorithms

EDUCATION

Washington High School
Fremont, CA • Expected in
06/2022

High School Diploma

WORK HISTORY

MEDTRAK - Backend and Blockchain Developer

- Used Ethereum and Flask to create a blockchain application designed to track ventilators across the nation during the COVID19 Pandemic.
- Learned how to work remotely, since my teammates were from Canada!
- Won 1st Place at TitanHacks, a 200-participant hackathon.

RecipEZ - Frontend Mobile Developer

- RecipEZ is a long-term project of mine, designed to use ingredients already in a user's fridge in order to recommend recipes
- Worked with professional tech devs in the industry to implement more complex software like AWS's Object Rekognition.

Eduvize - Full-Stack Developer

- A hackathon application made to motivate high school students to work for their allowance
- As a project leader, I developed both the frontend and backend side of this application. I learned a lot about OAuth and integration!
- Won 3rd place at SVHacks
